

RETURNING STUDENT REQUIREMENTS

Physical Examination Report

The Physical Exam Report is to be completed by the physician performing the physical exam. The laboratory tests are optional. **A physical is required for all 9th grade students. A physical must be preformed for all 11th grade students playing a sport. This is to comply with UIL standards.** While a physical exam is optional for all 7th grade students; vision, hearing and scoliosis screenings are required by the state. Parents may have their physician perform the vision, hearing and scoliosis screening on their child. If the results are not turned in to the Health Center by the beginning of school, the SSES medical staff will administer the screenings at a charge of \$25 per test. Students in grades not listed above are not required to have a physical examination.

Immunization Record

The **State of Texas Health Department** requires St. Stephen's to have a complete and current immunization record on each student. You will be notified by the Health Center if your current file is not complete and up to date. Any **new required immunizations** received by your child since their last physical must be listed on a physician report and should include the month/day/year in which it was given. Immunization records with only the year or series are **not** acceptable. Please be sure that your child's measles, tetanus, polio and hepatitis immunizations are up to date, including the booster. If your child is a boarding or Middle School student, the meningococcal vaccine is mandatory. If you are a boarder and have not had these vaccinations/tests, you must either receive them before you leave your home country or receive them from the St. Stephen's school physician at an extra charge within 30 days of arrival on campus.

In order for your child to attend sports camps or register for the first day of classes, the Health Center must have all medical forms on file. If you have any questions, please contact the Health Center at (512) 327-1213, extension 231.

MANDATORY IMMUNIZATIONS-any missing immunizations are due by March 1, 2011

The following vaccinations are required:

1. DTP (Diphtheria, Tetanus, Pertussis (Whooping Cough))

Five doses of diphtheria-tetanus-pertussis vaccine; one dose must have been received on or after the 4th birthday. However, 4 doses meet the requirement if the 4th dose was received on or after the 4th birthday. For students aged 7 years and older, 3 doses meet the requirement if one dose was received on or after the 4th birthday.

2. Tdap (Tetnus/Diphtheria/Pertussis)

For 7th grade: 1 dose of Tdap is required if at least 5 years have passed since the last dose of tetanus-diphtheria-containing vaccine.

For 8th – 12th grade: 1 dose of Tdap is required when 10 years have passed since the last dose of tetanus-diphtheria-containing vaccine. Td is acceptable in place of Tdap if a medical contraindication to pertussis exists.

3. Polio

4 doses of polio vaccine one of which must have been received on or after the 4th birthday; however, 3 doses meet the requirements if the 3rd dose was received on or after the 4th birthday.

4. Measles, Mumps, and Rubella (MMR)

The first dose of MMR must be received on or after the 1st birthday. For 2nd – 12th grade the requirement is 2 doses of a measles-containing vaccine, and one dose each of rubella and mumps vaccine.

5. Hepatitis B

For students aged 11-15 years, 2 doses meet the requirement if adult hepatitis B vaccine (Recombivax) was received. Dosage and type of vaccine must be clearly documented. (Two 10 mcg/1.0 ml of Recombivax).

6. Chicken Pox (Varicella)

The first dose of varicella must be received on or after the first birthday. 2 doses are required for K, 1st, 7th, and 8th grade. 1 dose is required for all other grade levels. For any student who received the first dose on or after 13 years of age, 2 doses are required.

7. Meningococcal / Meningitis –

REQUIRED FOR ALL BOARDING STUDENTS & ALL STUDENTS GRADES 6-8 The State now requires students 8th grade and below to have one dose of this vaccine. Boarders must have the vaccine. If the parent wishes, the school will arrange this important immunization for any boarder if they have not received this vaccine upon arrival to campus. However, there is a charge for this vaccination.

8. Hepatitis A

The first dose of hepatitis A must be received on or after the first birthday.

9. Tuberculosis – REQUIRED FOR INTERNATIONAL STUDENTS ONLY

In addition to required vaccinations, you must have a tuberculosis (TB) skin test using the Intradermal Mantoux Method – not a multiple puncture test – within ninety (90) days prior to the opening of the school, unless you have had a negative test result within the last year. If you have had a positive skin test or have received BCG within the last five years, a copy of the CXR report (xray) is required.

Required for all 9th grade students and 11th grade sport students

STUDENT PHYSICAL EXAMINATION REPORT

All Sections Must be Completed by Physician within the 2010 calendar year

Date of Exam _____

Student's Name _____ Birthdate _____ Gender M F

Height _____ Weight _____ Blood Pressure _____ Pulse _____

Vision (R) 20/_____ (L) 20/_____ with correction _____ without correction _____

	Normal	Abnormal	Not Examined	Comments

PHYSICAL EXAM TO BE RETURNED BY March 1, 2011

Patient Information
GROUP IMMUNIZATION
INFLUENZA (FLU) VACCINE for 2011-2012

Flu

Influenza (flu) is a respiratory disease caused by influenza virus infection. The types of strains of influenza virus may change from year to year, or even within the same year. People who get flu may have chills, fever, headache, dry cough and muscle aches and may be sick for several days to a week or more. Most people recover completely. However, for some people, flu may be especially severe, and pneumonia or other complications, including death, may develop.

Flu Vaccine

The regular flu vaccine contains killed influenza virus of the types selected by the U.S. Public Health Service and the Center for Biologics Evaluation & Research of the Food and Drug Administration. The types or strains of virus included are those which have most recently been causing influenza. The vaccine will not give you flu because it is a killed virus vaccine.

Risks and Possible Side Effects

Influenza vaccine generally causes only mild side effects that occur at low frequency. Most commonly, the reactions may be a sore or tender arm at the injection site, or possibly fever, chills, headache or muscle aches. These effects usually last 24 to 48 hours. Most people who receive the vaccine either have no or only mild reactions. There is a possibility, as with any vaccine administration that an allergic or other serious reaction, or even death, could occur. Moreover, untoward medical events completely unrelated to vaccine administration may occur coincidentally in the aftermath period following vaccination.

Unlike the 1976 swine influenza vaccine, flu vaccines used subsequently have not been clearly associated with an increased frequency of Cullain-Barr Syndrome, which is associated with paralysis.

Special Notice

Check with a physician if vaccination is being considered for:

1. Children under 3 years of age;
2. Pregnant Women;
3. People allergic to eggs, chicken, or chicken feathers;
4. People sensitive to thimerosal;
5. People who have an allergic neurologic disorder;
6. People who have received another type of vaccine during the past 14 days;
7. People with a fever, acute respiratory or other active infections or illnesses.

If you have questions, please ask now or check with a physician or your health department before receiving the vaccine.

If you experience any significant reactions, see your physician.

I have read the above information about influenza and the influenza vaccine and I have had a chance to ask questions. I understand the benefits and risks of influenza vaccination and request that the vaccine be given to the person named below for whom I am authorized to sign.

I understand I will be charged a fee of \$25 for this vaccine. I further understand that I must pay this charge even if I later decide to waive the flu shot, to cover the school's cost for ordering the vaccine at my request.

Day Student Medication Permission Form

NON-PRESCRIPTION MEDICATION: If you want your child to receive a non-prescription medication such as Tylenol, the parents **must bring the medication in its original container** along with a permission note. *By State law, the nurses cannot issue OTC medications to day students. Students are not allowed to dispense their own medications.* These OTC bottles must be labeled with the child's name and the proper permission forms must be on file with the nurses.

PRESCRIPTION MEDICATION: All medications must be: (1) in their original containers; (2) be properly labeled from the pharmacy; (3) contain current dosage information; and (4) be taken to the infirmary by the parent accompanied with a permission form. We are required to dispense your child's prescription medication exactly as your Doctor ordered.

- **One form must be completed for each medication. Multiple medications cannot be listed on one consent form.**
- **Parents may complete the form for non-prescription medications and prescription medications that are given 10 days or less.**
- **The child's health care provider MUST complete the form for long-term medications or when dosage directions state "consult a physician." Dosage administration of insulin requires the health care provider complete the form.**

Child's first & last name _____ Date of birth _____

Name of medication (including strength) _____

Amount/dosage to be given: _____ Route of Administration _____

Frequency to be administered: _____ or Identify the symptoms that will necessitate administration of medication: (signs & symptoms must be observed when possible / measurable parameters):

Possible side affects / Any known allergies: _____

What action should the health care provider take if side effects are noted:

Contact parent Contact prescriber at phone number provided below or Other (describe):

Additional special instructions: (include concerns related to possible interactions with other medications the child is receiving or concerns regarding the use of the medication as it relates to the child's age, allergies, or an pre-existing conditions. Also describe situations when medication should not be administered:

Reason the child is taking the medication: _____

Date consent form completed: _____ Date to be discontinued or length of time in days to be given: _____

Prescriber's name (please print): _____ Prescriber's Phone Number: _____

Licensed authorized prescriber's signature: _____
(Required for Long-term medication or when dosage directions state "consult a physician.")

Parent signature: _____

Inhaler Permission: My child _____, has my permission to carry his/her asthma inhaler(s) and to use as prescribed by their physician. I understand that my child is responsible for the proper use of his/her inhaler medication(s) and that their use will not be monitored by the St. Stephen's medical staff.

Due March 1, 2011
